

## What Should You Send Along From Home?

We always require parents to send along their dog's own food for their boarding trip—to keep the dog's digestive track as normal as possible. An abrupt change in food can cause diarrhea, vomiting, and overall intestinal distress.

Other than food and leash, nothing else is required! However, you are welcome to send along beds, toys, or anything else that would remind your pup of home. At Just Dogs, we strive to give every client a stress-free and fun experience!
